Highlights

- In Q2:2010, 1,2 million persons aged 15 years and older participated in volunteer activities.
- 64,2% of volunteers were women and 35,7% were men.
- About 439 000 individuals volunteered through organisations; while about 642 000 persons volunteered individually.
- Over 89% of volunteers were involved in only one volunteer activity.

Volunteer rate

- The rate of volunteering was higher among women than among men in all age groups except among those aged 65 years and older during the reference period.
- The volunteer rate increased with age up to the age of 45–54 years after which it declined.
- The black African and Indian/Asian populations had volunteer rates lower than the national average while the white and coloured populations had volunteer rates higher than the national average of 3,5%.
- Individuals who were married or those who were living together like husband and wife were more likely to volunteer than those who were never married.
- Persons with higher levels of education engaged in volunteer activities at higher rates than those with lower levels of education.

Hours volunteered and value of volunteering

- Women contributed 256 million hours and an average of 6,4 hours per week to volunteer activities. These could have amounted to R4,4 billion had the hours spent on volunteer work been remunerated. On the other hand men contributed 123 million hours with an average of 5,6 hours per week of volunteer activities which could have amounted to R3,1 billion had the hours spent on volunteer activities been compensated.
- People who were employed and also did some volunteer activities contributed 145 million hours to volunteer work which is valued at R3,1 billion (41,9% of total value of volunteer work), had they been rewarded for the volunteer work they did.
- Of the 550 000 individuals who offered their volunteer services through organisations (including those who offered volunteer services both directly and through organisations), the majority (520 000) volunteered in the services industry. They offered 211 million hours of their time which is valued at R4,6 billion.

1. Introduction

According to International Labour Organisation (ILO, 2011), volunteer work, is a crucial renewable resource for social and environmental problem-solving the world over. The scale of such work is enormous and the contributions it makes to the quality of life in countries everywhere larger still. Despite this, however, little sustained effort has gone into its measurement.

Statistics South Africa (Stats SA) conducted its first Volunteer Activities Survey (VAS) in the second quarter of 2010 (Q2:2010). This is a household-based sample survey that collects data on the volunteer activities of individuals aged 15 years and older who live in South Africa. This information is gathered from respondents who are members of households living in dwellings that have been selected to take part in the Quarterly Labour Force Survey (QLFS). VAS covers activities willingly performed for little or no payment to provide assistance or promote a cause in the four weeks preceding the survey interview. These activities can be performed either through an organisation or directly for someone outside one's own household. They take many forms, from picking up groceries for a disabled neighbour to participating to community policing.

At the time the survey was conducted it was recommended that volunteer activities performed for immediate family members should not be regarded as volunteer work. However, the definition of what constitutes one's family, or even immediate family, varies among countries and cultures, and differentiating this practice is difficult to achieve. Upon the finalisation of the International Labour Organisation (ILO) Manual on the Measurement of Volunteer Work, it was decided that activities performed for immediate family members should be regarded as volunteer work as long as the recipient is not a member of the household – only activities performed for household members are excluded.

In this report, the results presented are based on the draft ILO guidelines that were available at the time of the survey, which excluded household members as well as immediate family members. For this survey immediate family was defined as:

- Parents (including spouse's parents)
- Grandparents (including spouse's grandparents)
- Siblings (brothers and sisters) (including spouse's siblings)
- Children (biological and adopted)

2. Purpose of the survey

The main aim of this report is to provide information on the scale of volunteer work and bring into view the sizeable part of the actual labour force that is invisible in existing labour statistics.

The specific objectives of this survey are:

- To collect reliable data about people who are involved in volunteer activities.
- To identify organisation-based and direct volunteering.
- To give a profile of those engaged in volunteer activities.
- To estimate the economic value of volunteer work.

3. How was VAS conducted?

The Volunteer Activities Survey (VAS) consisted of two stages. The first stage involved identifying individuals who were involved in volunteer activities through the QLFS conducted in the second quarter of 2010 (Q2:2010). The second stage involved follow-up interviews with individuals who were involved in volunteer activities, to determine the type of activities they were involved in and whether the activities performed were organisation-based or direct volunteering.

In Q2:2010, questions on volunteer activities were included in the QLFS questionnaire and were asked of all households members aged 15 years and older. The screening process for VAS was performed to

ensure that only persons eligible for the VAS (persons who indicated that they were involved in some volunteer work during the QLFS) were re-visited. Approximately 2 499 individuals eligible for VAS were followed up to conduct detailed interviews about their volunteer activities during the reference period. The QLFS data were collected in the middle two weeks of the month throughout the quarter, while VAS data collection was done in the last week of a month, also throughout the quarter.

4. Results

The results presented in this report are based on individuals who were involved in some form of volunteer work performed during the Quarterly Labour Force Survey (QLFS) data collection period of Q2:2010. Weights have been applied to the sample estimates to reflect the entire South African civilian population. If a person was involved in more than three volunteer activities, the details were obtained for the three main ones. Main volunteer activity was regarded as the one on which the respondent spent the most time. The vast majority of individuals, who were engaged in volunteer activities, were involved in one volunteer activity. The number of hours spent on these activities during the reference period (i.e. four weeks prior the interview) were collected and computed to reflect total hours volunteered in the last 12 months. The value of volunteering was also derived to reflect annual values.

4.1 Profile of individuals involved in volunteer activities

Table 1: Distribution of volunteers by type of volunteering and number of volunteer activities

Type of volunteering	Volunteers	
	Thousand	Per cent
Total volunteer work by persons with at least one volunteer experience	1 193	100,0
Organisation-based volunteering only	439	36,8
Direct volunteering only	642	53,9
Both (organisation-based and direct volunteering)	111	9,3
Number of volunteer activities	1 193	100,0
One	1 068	89,6
Two	102	8,5
Three	23	1,9

Table 1 shows that those who only volunteered directly as individuals accounted for 53,9% of total volunteer work, 36,8% of the volunteers offered their volunteer services through organisations only while the remaining 9,3% volunteered both directly as individuals and through organisations.

Over 89% of volunteers performed only one volunteer activity during the reference period (four weeks prior to the interview), while 8,5% of volunteers performed two activities and 1,9% reported performing three volunteer activities.

Table 2: Distribution of volunteers by type of volunteering, number of volunteer hours and sex

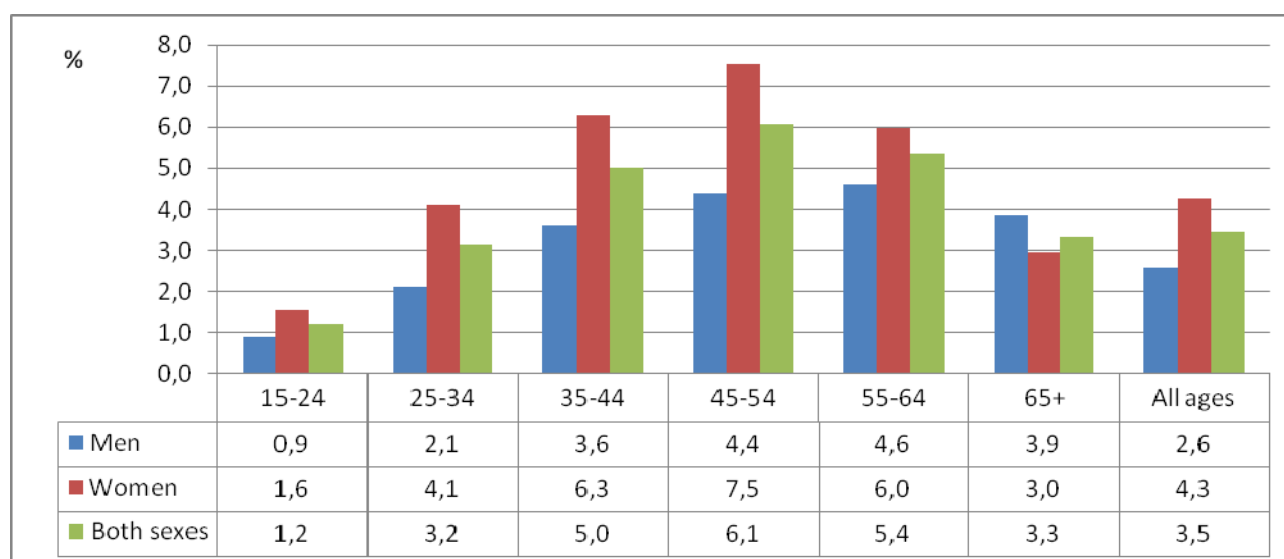

Type of volunteering	Number of volunteers	Total hours volunteered, 4 weeks	Total hours volunteered, 12 months
		Thousand	
Total volunteer work by persons with at least one volunteer experience	1 193	29 176	379 291
Men	426	9 497	123 456
Women	766	19 680	255 835
Organisation-based volunteering only	439	15 435	200 655
Men	172	5 214	67 784
Women	267	10 221	132 871
Direct volunteering only	642	11 898	154 673
Men	207	3 381	43 952
Women	435	8 517	110 721
Both (organisation-based and direct volunteering)	111	1 843	23 963
Men	47	901	11 719
Women	64	942	12 244

Table 2 suggests that, approximately 1,2 million persons aged 15 years and older were engaged in volunteer activities during the reference period. They contributed 29,2 million hours to the community during the reference period, engaging in many different activities through organisations or as individuals. If these hours are computed for the 12 months period, they amount to approximately 379 million hours.

4.2 Volunteer rate

The volunteer rate is a convenient expression of the extent to which the country’s population engages in volunteer activities. It is computed by dividing the number of volunteers identified by the population aged 15 years and older during the reference period.

Figure 1: Volunteer rate by age and sex

According to Figure 1, the volunteer rate increased with age up to the age of 45–54 years, after which it declined. Similar to the national average, this rate peaked in the 45–54-year-old age group among women at 7,5%, and gradually declined to 6,0% in the 55–64-year-old age group, and to 3,0% in the older age group (65+ years). Among men, the volunteer rate peaked in the 55–64-year-old age group at 4,6%, and declined to 3,9% in the 65+ age group. The rate of volunteering was consistently higher (higher than the national average) among women than among men in all age groups except among those aged 65 years and older.

Figure 2: Volunteer rate by population group and sex

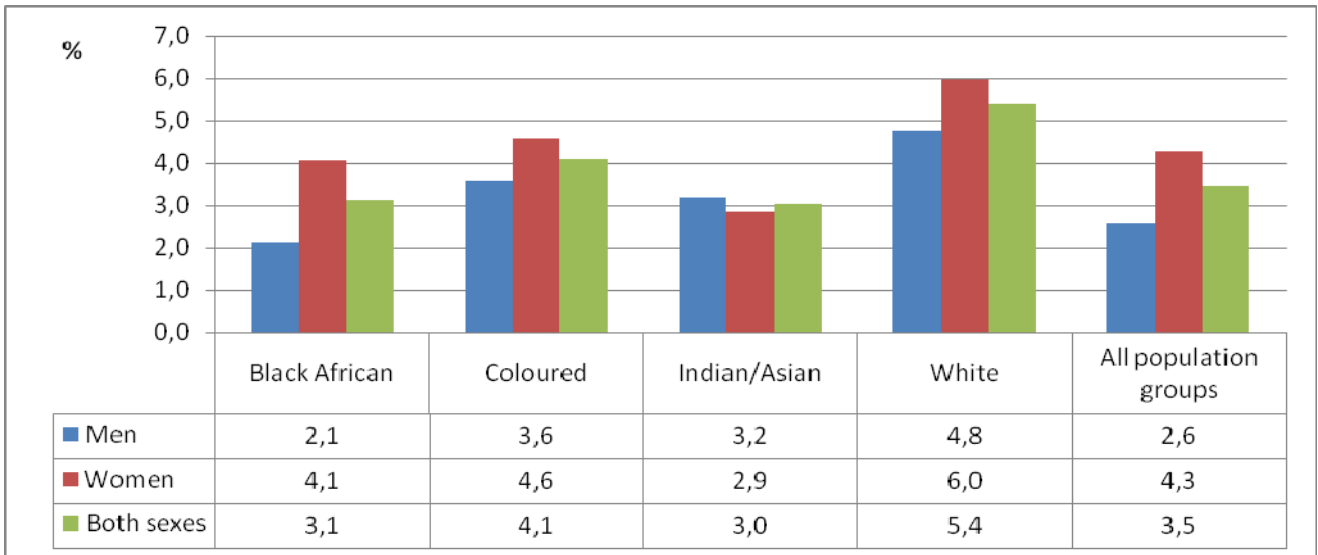

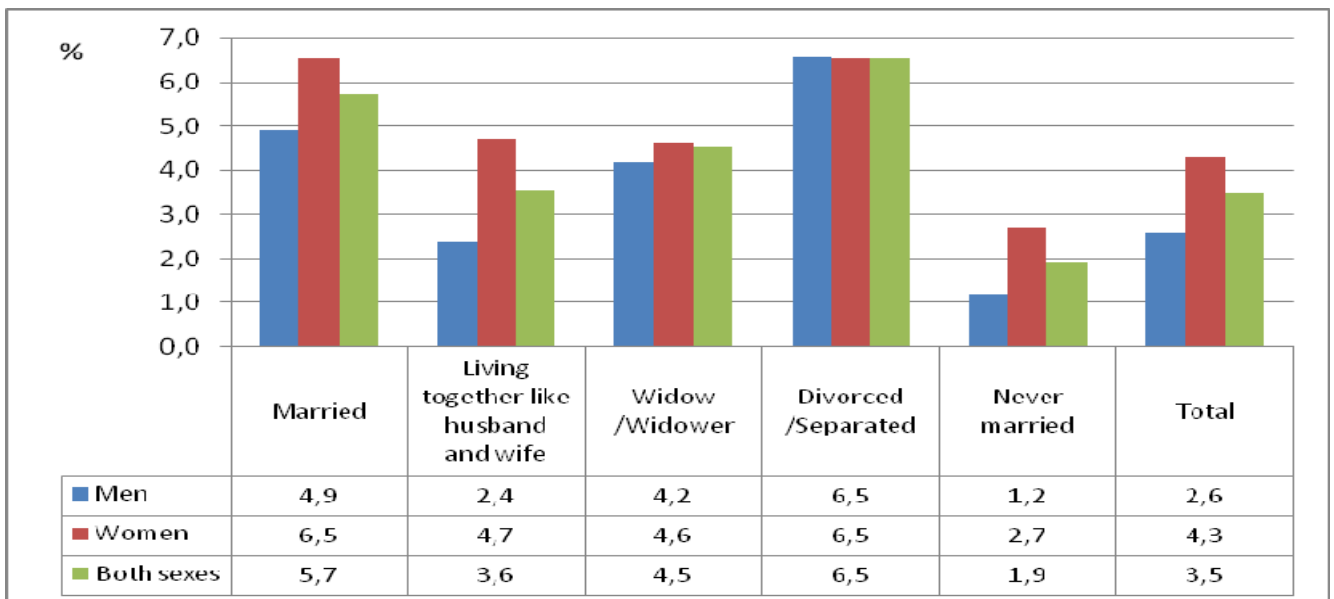

Figure 2 shows that the white population was more likely to be involved in volunteer activities than other population groups – with a volunteer rate of 5,4%. The volunteer rate among the white population group was 1,3 percentage points higher than the volunteer rate among the coloured population that had a volunteer rate of 4,1%. The volunteer rate was lowest among black African men who had a volunteer rate of 2,1%. Women had a higher volunteer rate than men among all population groups except among the Indian/Asian population where the volunteer rate among men was 0,3 of a percentage point higher than among women. The black African and Indian/Asian population groups had volunteer rates lower than the national average while the white and coloured populations had volunteer rates higher than the national average of 3,5%.

Figure 3: Volunteer rate by marital status and sex

The pattern of volunteering varied with marital status according to Figure 3. Individuals who were married or those who were living together like husband and wife were more likely to volunteer than those who were never married. The volunteer rate was highest among divorced/separated women (6,5%) and married women (6,5%). Among their male counterparts the volunteer rates were 6,5% and 4,9% respectively. The lowest volunteer rates were observed among those who had never married with a rate of 2,7% among women and 1,2% among men.

Figure 4: Volunteer rate by educational attainment and sex

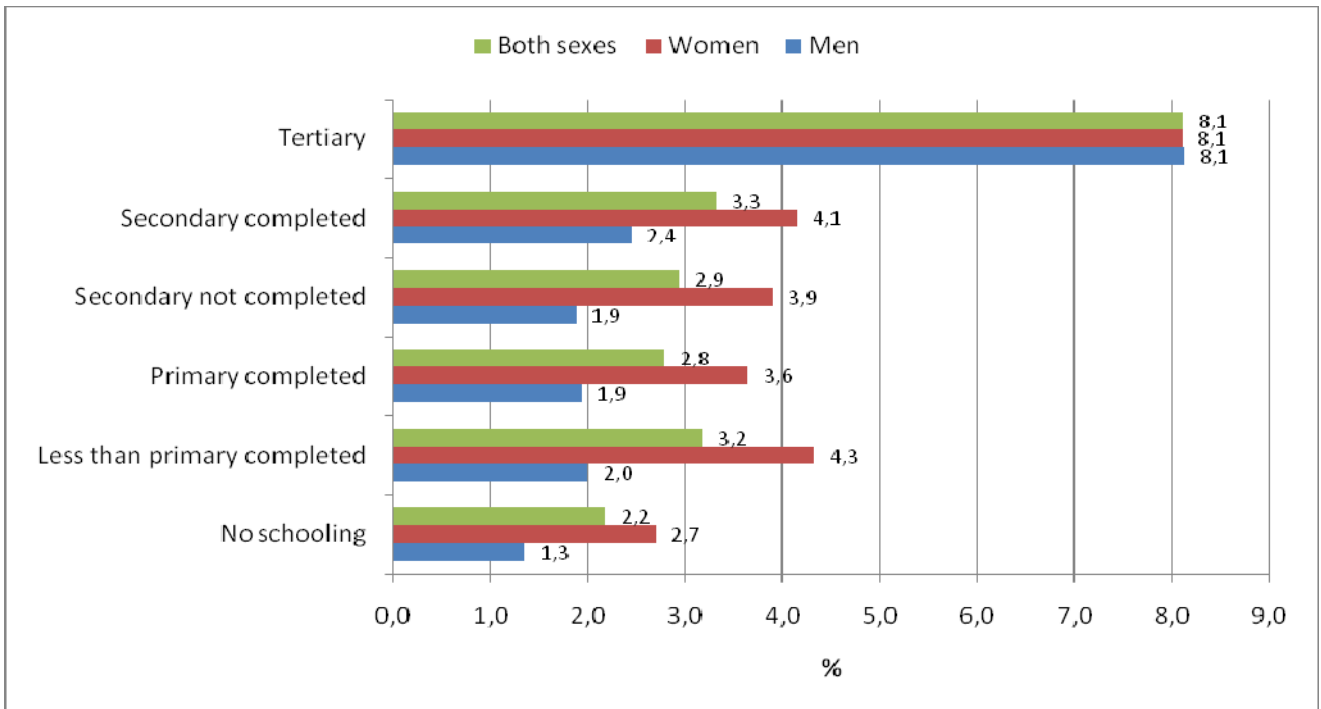

Figure 4 shows that persons with higher levels of education were engaged in volunteer activities at higher rates than those with a lower level of education. Over 8,0% of persons with tertiary education volunteered, compared to 3,3% among those who only completed secondary education. Persons with no schooling had the lowest volunteer rate (2,2%). As indicated earlier in the report, women volunteered more than men, but among those with tertiary education, men and women volunteered at the same rate (8,1%).

4.3 Value of volunteer work

One of the objectives of the survey is to estimate the economic value of volunteer work. There are two general methods of estimating the economic value of volunteer and unpaid work. These are:

a) Opportunity cost method

This method estimates the value by assigning to the hours of volunteer work the average wage that the volunteer would have earned if that volunteer had worked at his or her regular job for those same hours. For example, if a medical doctor volunteers as a teacher assisting in a basic adult education programme in his community, his work will be valued at the rate he or she gets as a doctor, not as a teacher.

b) Replacement cost method

This method estimates the value by assigning to the hours of volunteer work what it would have cost to hire someone to do the work that the volunteer was doing for no pay. For example, if a medical doctor volunteers as a teacher, his work will be valued at the rate of what a teacher is paid. This is the method recommended by ILO and it has been adopted in this report.

For this report the median hourly earnings by occupation have been used to assign value to the hours a volunteer worked in that particular occupation. Stats SA prefers using median hourly earnings rather than mean hourly earnings because of their much greater stability through time. The median hourly earnings were obtained from the Quarterly Labour Force Survey (QLFS). In order to obtain a total value of both direct and organisation-based volunteering, only median hourly earnings by occupation were considered. The median hourly earnings were multiplied by the total hours volunteered to get the value for the reference period (four weeks prior the interview) and this was converted to the value for 12 months.

Table 3: Number of volunteers, volunteer rate, volunteer hours and value of volunteering by sex

	Number of volunteers Thousand	Volunteer rate %	Reference period		Computed	
			Total hours volunteered, 4 weeks	Value of volunteer work, 4 weeks	Total hours volunteered, 12 months	Value of volunteer work, 12 months
			Thousand	R'000	Thousand	R'000
Total volunteering population	1 193	3,5	29 176	577 163	379 291	7 503 120
Men	426	2,6	9 497	240 717	123 456	3 129 325
Women	766	4,3	19 680	336 446	255 835	4 373 795

Table 3 suggests that, South Africans spent about 379 million hours on volunteer work over a 12-month period, averaging 6,1 hours per week of volunteer activity per person. Women contributed about 19,7 million hours during the reference period, which is approximately 256 million hours over a 12-month period and an average of 6,4 hours per week of volunteer activities per person. Had this work been compensated, it would have cost R4,4 billion annually. On the other hand, men contributed 9,5 million hours, with an average of 5,6 hours per week of volunteer activity per person. This is approximately 123 million hours per year valued at R3,1 billion.

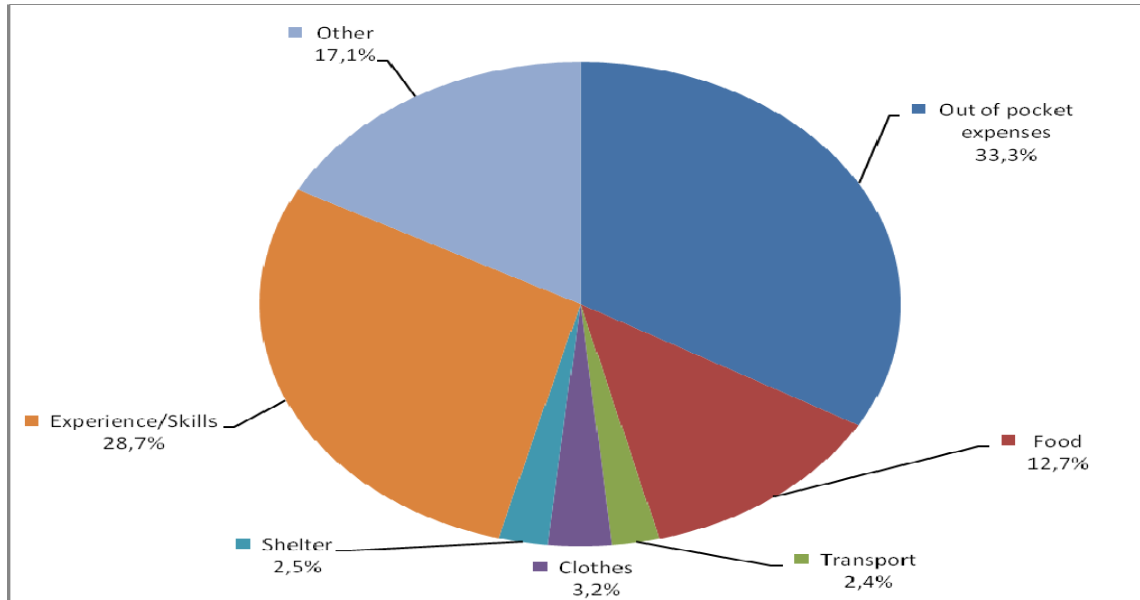

Table 4: Number of volunteers, volunteer rate, volunteer hours and value of volunteering by labour market status

	Number of volunteers Thousand	Volunteer rate %	Reference period		Computed	
			Total hours volunteered, 4 weeks	Value of volunteer work, 4 weeks	Total hours volunteered, 12 months	Value of volunteer work, 12 months
			Thousand	R'000	Thousand	R'000
Total volunteering population	1 193	3,5	29 176	577 163	379 291	7 503 120
Employed	559	4,2	10 623	241 756	138 096	3 142 832
Unemployed	180	4,1	6 353	110 573	82 585	1 437 453
Not economically active	454	2,7	12 201	224 833	158 610	2 922 835
Discouraged work-seekers	90	4,6	3 512	46 072	45 653	598 930
Other (NEA)	364	2,5	8 689	178 762	112 957	2 323 906

Table 4 shows that among the employed population, 4,2% volunteered during the reference period, while 4,1% of unemployed persons and 2,7% of the not economically active persons were involved in volunteer work. Within the inactive population the highest rate of volunteering was observed among discouraged work-seekers who recorded a volunteer rate of 4,6%. The unemployed had a higher volunteer rate than the not economically active population, possibly because they volunteered with the hope of gaining experience or skills so that they could stand a better chance of finding jobs in the labour market.

People who were employed and also did some volunteer work contributed about 145 million hours to volunteer work over a 12-month period, which is valued at R3,1 billion (41,9% of the total value of volunteer work), had they been rewarded for the volunteer work they did. The not economically active population contributed approximately 159 million hours over a 12-month period, valued at R2,9 billion (39,0% of the total value of volunteer work), while the unemployed contributed approximately 82 million hours over a 12-month period, valued at R1,4 billion (19,2% of the total value of volunteer work).

Figure 5: Distribution of what volunteers received/expected to receive in their main volunteer activity

Apart from the satisfaction that comes from helping people, the volunteers were asked whether they received or expected to receive something for their help. Those who indicated that, they did receive or expected to receive something were then asked what they received or expected to receive for their help.

A third (33,3%) of the volunteers received or expected to receive out-of-pocket expenses, while 28,7% received or expected to receive experience or skills, and 12,7% received or expected to receive food. A further 8,1% received or expected to receive transport, clothes and shelter (see Figure 5).

Table 5: Number of volunteers, volunteer hours and value of volunteering by occupation

Volunteer Occupations	Reference period		Computed		
	Number of volunteers	Total hours volunteered, 4 weeks	Value of volunteer work, 4 weeks	Total hours volunteered, 12 months	Value of volunteer work, 12 months
		Thousand		R'000	Thousand
All volunteers (at least one volunteer activity)	1 193	29 176	577 163	379 291	7 503 120
Managers	62	1 189	66 349	15 454	862 533
Professionals	53	932	54 200	12 119	704 605
Technicians	231	4 798	200 841	62 372	2 610 930
Clerks	53	1 151	29 844	14 962	387 966
Sales and service workers	374	10 762	121 658	139 900	1 581 557
Skilled agricultural and fishery workers	4	160	2 047	2 078	26 606
Craft and related trades workers	63	1 475	23 121	19 174	300 574
Plant and machine operators	31	521	7 154	6 767	92 998
Elementary occupation	425	8 190	71 950	106 465	935 350

Note: Because a person may volunteer in more than one occupation, figures do not add up to the total.

Persons in Elementary occupations accounted for the biggest number of volunteers (425 000), followed by persons in Sales and service worker occupations (374 000), and Technicians with 231 000. Volunteering is not very common within the Skilled agricultural and fishery worker occupations as only 4 000 people who volunteered fell in this occupational category.

4.4 Volunteering through organisations

Since industry is linked to the organisations, the analysis that follows is only based on persons who volunteered through organisations and both (through organisations and direct).

Table 6: Number of volunteers, volunteer hours and value of volunteering by industry

Volunteer Industry	Reference period			Computed	
	Number of volunteers	Total hours volunteered, 4 weeks	Value of volunteer work, 4 weeks	Total hours volunteered, 12 months	Value of volunteer work, 12 months
	Thousand	Thousand	R'000	Thousand	R'000
Both sexes (at least one volunteer activity)	550	17 278	372 894	224 618	4 847 622
Community and social services	520	16 261	352 022	211 399	4 576 282
Other industries	39	1 017	20 872	13 219	271 340

Note: Because a person may volunteer in more than one industry, figures do not add up to the total.

Of the 550 000 individuals who volunteered through organisations and both (through organisations and direct), the majority (520 000) volunteered in the Community and social services industry. They offered approximately 211 million hours of their time over a 12-month period, which is valued at about R4,6 billion. All other industries contributed only 13,2 million hours to volunteer activities over the same period, valued at R271 million.

Table 7: Number of volunteers, volunteer hours and value of volunteering by type of organisation

	Reference period			Computed	
	Number of volunteers	Total hours volunteered, 4 weeks	Value of volunteer work, 4 weeks	Total hours volunteered, 12 months	Value of volunteer work, 12 months
	Thousand	Thousand	R'000	Thousand	R'000
Organisation-based volunteering only ((at least one volunteer activity))	550	17 278	372 894	224 618	4 847 622
Charity/non-profit organisation/NGO/CBO	185	8 167	168 424	106 177	2 189 516
Religious	249	3 910	106 235	50 829	1 381 049
Political	12	404	9 437	5 253	122 678
Union	3	40	1 505	517	19 569
Private business	27	689	18 091	8 951	235 187
Private school	8	226	7 922	2 938	102 985
Government school	23	614	18 667	7 987	242 672
Private hospital/clinic	3	89	1 092	1 158	14 194
Government hospital/clinic	9	523	7 914	6 801	102 885
Other government entity	54	2 612	33 449	33 958	434 832

Note: Because a person may volunteer in more than one type of organisation, figures do not add up to the total.

Among organisation-based volunteers, 249 000 volunteered through religious organisations; 185 000 volunteered through charity/non-profit organisations/NGOs/CBOs, and the rest through other types of organisations.

4.5 Full-time equivalent

The 1,2 million volunteers contributed approximately 379 291 000 hours over the 12-month period. Assuming a 40 hour week, this is equivalent to 182 351 persons working full time. The number of persons who volunteered through organisations only was about 439 000 and they contributed approximately 200 655 000 hours over a 12-month period. These 201 million hours are equivalent to 96 469 persons working a 40-hour week.

PJ Lehohla
Statistician-General: Statistics South Africa

5. Technical notes

5.1 Response details

Table 8: Response rates by province

Province	Apr–Jun 2010
	Per cent
Western Cape	89,5
Eastern Cape	93,1
Northern Cape	88,1
Free State	90,4
KwaZulu-Natal	94,2
North West	94,9
Gauteng	89,3
Mpumalanga	92,9
Limpopo	93,1
South Africa	91,3

5.2 Survey requirements and design

During the Quarterly Labour Force Survey (QLFS) of quarter two 2010, persons involved in volunteer activities were screened and later interviewed for the Volunteer Activities Survey (VAS). The VAS interviews were not conducted at the same time as the QLFS. This resulted in a reduction of VAS persons compared to the ones identified during QLFS screening, due to persons refusing to participate in the VAS, persons not at home during VAS interviews, demolished structures, vacant dwellings, etc. If all qualifying VAS persons identified in QLFS Q2:2010 responded positively during VAS interviews, there would have been no adjustment of VAS weights. The final VAS weights would be the same as the QLFS calibrated weights. The VAS weight adjustment accounts for those persons who qualified for VAS, but refused to take part or were not available for interviews. Persons identified as ineligible for VAS were not accounted for when doing weights adjustment.

5.3 Weighting

The sampling weights for the data collected from the sampled households are constructed in such a manner that the responses could be properly expanded to represent the entire population of South Africa. The weights are the result of calculations involving several factors, including original selection probabilities, adjustment for non-response, and benchmarking to known population estimates from the Demographic division of Stats SA.

5.4 Non-response adjustment

In general, imputation is used for item non-response (i.e. blanks within the questionnaire) and edit failure (i.e. invalid or inconsistent responses). The eligible households in the sampled dwellings can be divided into two response categories: respondents and non-respondents; and weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.).

5.5 Final survey weights

The final VAS weight assigned to each responding unit is computed as the product of the QLFS person weight and the non-response adjustment factor. The sum of the QLFS person weight qualifying for VAS (for both respondents and non-respondents, excluding out-of-scope persons) must be equal to the sum of the final VAS person weight.

6. Definitions

Employed persons are those aged 15–64 years who, during the reference week, did any work for at least one hour; or had a job or business but were not at work (temporarily absent).

Status in employment: There are four statuses in employment which, when added together, are equal to the employed.

Employee: A person who works for a public sector or private sector employer and receives remuneration in wages, salary, commission, tips, piece-rates or pay in kind.

Employer (employing one or more employees): A person who operates his/her own economic enterprise or engages independently in a profession or trade, and hires one or more employees.

Own-account worker (not employing any employees): A person who operates his/her own economic enterprise or engages independently in a profession or trade, and hires no employees.

Unpaid in a household business: Because these workers are not paid, they are excluded from the earnings questions.

Volunteer activity: Activity willingly performed for little or no payment, to provide assistance or promote a cause, either through an organisation or directly for someone outside one's own household or immediate family.

Immediate family is intended to embrace close relatives, those for whom a person would normally feel a sense of familial obligation. Caring for one's parents and grandparents would thus likely not be considered "volunteer work" for the purpose of this survey.

'Immediate family members' refers to:

Parents (including spouse's parents)

Grandparents (including spouse's grandparents)

Siblings (brothers and sisters) (including spouse's siblings)

Children (biological and adopted)

Organisation can be formal bodies/entities that can be either registered or not to operate (can be non-profit, for-profit or a unit or agency of government), and includes schools, religious organisations, and sports or community associations.

Organisation-based volunteering refers to volunteering done for or through non-profit institutions or other types of organisations.

Direct volunteering refers to volunteering directly for individuals.

Number of hours volunteered refers to the duration in hours of each activity that the respondent identifies as having been performed during the reference period.

Out-of-pocket expenses refers to payment received for travel costs, food costs and other expenses incurred by a volunteer whilst performing an activity.

Volunteer rate represents the percentage of the population that reports engaging in any in-scope volunteer activity during the reference period. It is computed by dividing the number of volunteers identified through the volunteering module by the population (15 years and older) of the country.

Occupation (type of work performed) refers to the type of activity/work performed by the volunteer for each in-scope volunteer activity during the reference period.

Industry (field of work) refers to the main activity carried out by the unit through which the volunteer activity/work is performed.

Value of volunteering

Replacement cost (recommended). By assigning to the hours of volunteer work what it would cost to hire someone for pay to do work that the volunteer is doing for no pay.

Appendix 1

Volunteer industry	Total volunteer work by persons with at least one volunteer experience		
	Number of volunteers	Total hours volunteered, 12 months	Value of volunteer work, 12 months
	Thousand		R'000
Women	331	145 114	2 660 222
Agriculture	2	1 274	12 266
Mining			0
Manufacturing	2	194	3 247
Utilities			0
Construction	2	1 628	18 714
Trade	3	2 439	67 849
Transport			0
Finance	6	1 837	38 144
Services	318	137 742	2 520 002
Private household			0
Other			0

Note: Because a person may volunteer in more than one industry, figures do not add up to the total.

Table 8: Organisation-based volunteer work by sex and type of organisation

	Number of volunteers	Total hours volunteered, 12 months	Value of volunteer work, 12 months
	Thousand		R'000
Both sexes	550	224 618	4 847 622
Charity/Non-profit organisation/NGO/CBO	185	106 177	2 189 516
